DISCOVERY CONFERENCE ORDER NO. 10

The Court held a discovery conference call on April 12, 2017. This Order serves to memorialize the key topics of discussion during the call, including any agreements of counsel and orders of the Court.

The parties agree that Defendants will produce the NDAs and INDs for the non-tablet formulations of aripirazole by May 3, 2017. The parties have reached an agreement regarding the formats required for this production along with a new schedule for the production of expert reports from biostatisticians. The parties intend to promptly file a stipulation memorializing this agreement. The parties also intend to promptly file a stipulation memorializing their agreement on proposed changes to the previously entered Protective Order, ECF No. 185.

Regarding privilege logs, Defendants must produce their privilege logs by May 3, 2017. At that time, the Court will entertain the parties' positions on when Plaintiffs' objections and Defendants' responses should be due. Defendants'

privilege logs should identify the job title of any individual whose position forms the basis of a privilege claim.

The Court would benefit from clarity regarding what categories of documents have been produced and what remains to be produced. Therefore, Defendants are required to produce a list of the categories of documents that have been produced, as well as the categories of documents that are going to be produced between now and May 3, 2017. This list should be filed by April 21, 2017.

Plaintiffs intend to submit a proposed order regarding the authentication of business documents. The Court will entertain this issue at the May 5, 2017, Case Management Conference. Plaintiffs also intend to submit a proposed order authorizing the release of documents in relation to filed cases only. Plaintiffs have submitted this proposal to Defendants for review. Defendants should inform the Plaintiffs of their position on the proposed order by Monday at noon.

Finally, the parties requested that the Court hold a discovery conference call on Monday, April 17, 2017, to address the production of the Adverse Event Database. This conference call will be held at 10:30 a.m. (CDT).

DONE and **ORDERED** on this 13th day of April, 2017.
